

MUHAMMAD SHAHZAIB

Full Stack Developer

MuhammadShahzaibgpp@gmail.com — LinkedIn — GitHub — Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with experience across multiple stacks. Currently a Computer Science student at NUST, I combine my studies with active leadership in student societies. I am passionate about building AI applications and web solutions that help solve real-world problems.

PROFESSIONAL EXPERIENCE

Frontend Developer — Enigmatix, OnSite

May 2025 – Nov 2025

- Built and launched new features for the Office Management System (OMS) while fixing bugs in the legacy code to improve system stability.
- Worked with the backend team to design and fix APIs, then integrated them into the frontend to ensure all data synced correctly.
- Polished the UI and finished the feature set to make the system more reliable and ensure everything worked as intended for the users.

Frontend Developer — ThinkSoft, Remote

Nov 2024 – Mar 2025

- Built and updated web pages to expand the dataset used for training the company's AI model.
- Developed frontend layouts using Tailwind CSS and JavaScript, focusing on creating structured pages for the AI to process.

TECHNICAL PROJECTS

Intelligent AI Drawing Tutor — Next.js, FastAPI, Supabase, ElevenLabs, Claude, Gemini

Developed a comprehensive agentic AI application that functions as an interactive drawing tutor.

- Engineered a multimodal interface supporting real-time voice, text, and video call interactions, utilizing ElevenLabs for voice synthesis.
- Orchestrated a multi-model architecture using **Claude** for high-level reasoning and conversational logic, while leveraging **Gemini** for efficient context retention and memory management.
- Implemented a sophisticated memory system using Supabase to store chat sessions, allowing the agent to "learn" from previous interactions and maintain continuity across long-running sessions.

Sales Portal & Campaign Manager — Next.js, Supabase

Developed a centralized CRM and ERP solution that digitized the company's entire sales pipeline, providing a single source of truth for managing leads and field agent performance.

- Integrated a keyword-driven scraper to automatically populate the system with potential client locations and details, streamlining lead generation.
- Designed a campaign management workflow where managers can bundle these aggregated locations into campaigns and assign them to specific sales agents.
- Implemented a Kanban-style dashboard allowing managers to track progress while sales agents visit sites, log comments, and update status in real-time.

EDUCATION

Bachelor of Science in Computer Science (BSCS)

Sep 2023 – Jun 2027

National University of Sciences and Technology (NUST), Main Campus
(Currently in 6th Semester)

Relevant Coursework: Data Visualization, Operating Systems, Web Technologies, Databases, Advanced Databases, Artificial Intelligence, Data Structures & Algorithms, Information Security, Networking.

EXTRA-CURRICULAR ACTIVITIES

DD in CHADAR (Community Service Society)

Served as a key member of the community service society dedicated to social welfare. Facilitated major initiatives including Iftar drives during Ramadan, cloth donation drives, and visits to orphanages to support underprivileged communities.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, C#, HTML5, CSS3

Frontend: React.js, vue.js, Next.js, Tailwind CSS, Framer Motion

Backend: Django, .NET Web API, FastAPI, nodejs, express

Database & State: PostgreSQL, Supabase, Redux Toolkit, Zustand, Pinia

Tools & Platforms: Git, GitHub, ElevenLabs API, Langchain, n8n
